Energy Efficiency & Indoor Environmental Quality

- Use of energy efficient fixtures (LED lighting), high COP HVAC system with stand by passive cooling system- Chilled Beam System. **Reduces at least 40% of annual energy consumption**
- Use of Sensors, Astronomical Timers, Pumps, Motors

- **95% of regularly occupied living spaces daylighted- reduces lighting consumption by 60%.**

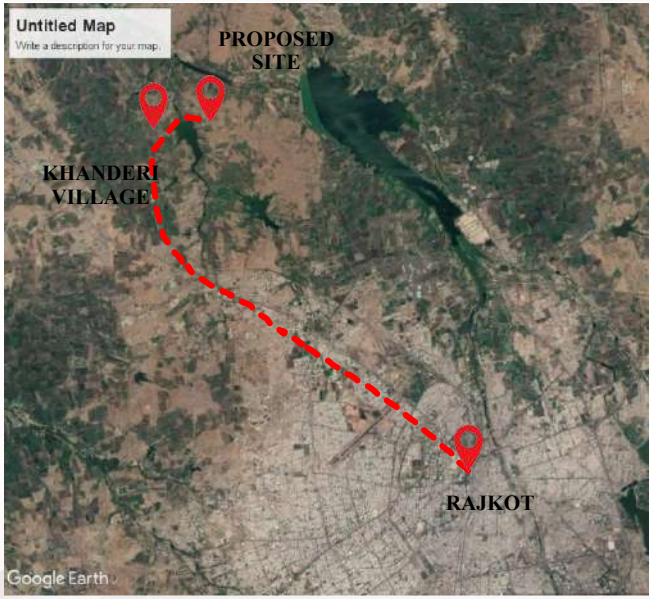

- **Renewable Energy Utilization- Solar Photovoltaic's & Solar Water Heaters.**

SITE LOCATION

Location of Rajkot in Gujarat

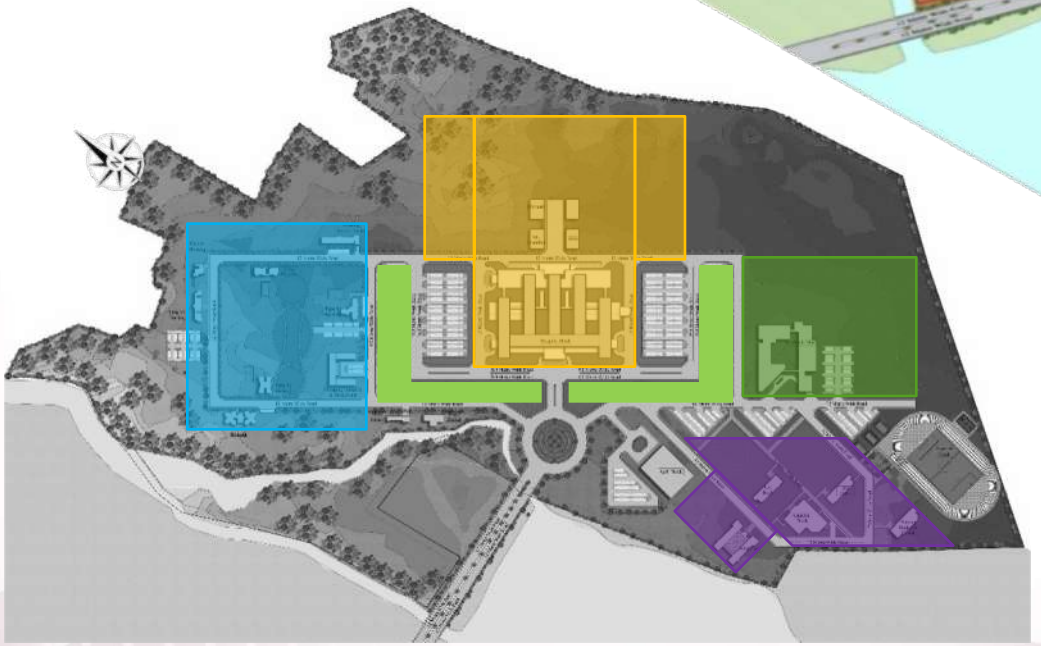

Site Location in Rajkot

- The Site is Located Near Khanderi Village of Gujarat.
- The main city of Rajkot is situated at a distance of 11.8 Kms from proposed site.
- There is no direct connectivity between Khanderi Village and proposed site due to an existing water body.
- A New Four lane road is proposed by the state administration to connect Khanderi road with the proposed site for AIIMS

PROPOSED GROUND FLOOR PLAN

Additional changes suggested in Ground floor plan:-

Drinking water position change as to achieve ideal design or barrier free such that anyone can easily get the water .
It has to be nearer to toilets areas.

Existing Ramp has widen to get a clear 5'-3" space to go to the OPD zone..

Toilets
- Redesign in same location
- Reoriented as/standards of toilets fixtures.
- giving 2 W.C ,3 urinals, and 2 wash basins in male toilet.
- giving 2 W.C, and 1 wash basins in the female toilet. As shown in design

Counseling Room
Proposed for five People with fixed glass partition as shown in design.

Billing counter
Space for two billing counter has design providing clear queue space without disturbing the corridor circulation.

CONCEPTUAL DESIGN VIEW

PROPOSED FIRST FLOOR PLAN

Labor Suite- Childbirth, also known as **labour and delivery**, is the culmination of a period of pregnancy witl the expulsion of one or more newborn infants from a woman's uterus.

We have proposed labor suite nearer to the labor room and O.T complex zone.

Creating a air Lock between NICU/HDU to the outside waiting lobby.
Ideally NICU/HDU should be germs free environments.

Here in this zone we have provided shoe racks, Lockers for growing change, Scrub for washing & cleaning.

Additional supportive room in NICU/HDU, zone for runnin of this departments-
Mother rest/Baby Feeding Room
Formula room- (its like a cold storage of medicine and related instruments.)
Linen Bay, Baby washing Bar, D.U, C.U and J.C

N.I.C.U A Neonatal Intensive-care Unit (**NICU**), also known as an **intensive care nursery** (**ICN**), is an intensive-care unit specializing in the care of ill or premature newborn infants.

We have proposed 5 beds for N.I.C.U with a space for nursing station also.
Very closer to HDU and mother rest/baby feeding room.
